

Energy Management Policy

Asia Metal Public Company Limited (hereinafter referred to as “AMC”), a manufacturer and distributor of structural steel, is committed to efficient energy management, energy conservation, and resource optimization to enhance the organization's sustainability and reduce overall energy consumption. This policy is established as a guideline for efficient energy utilization in alignment with sustainable development goals across all areas of operation.

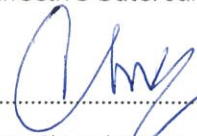

This policy applies to all energy-related activities within the company, including office buildings, manufacturing plants, transportation, and other operational processes. The following guidelines are implemented:

1. Promote efficient energy use across all departments by integrating energy-efficient equipment and technologies appropriate to business operations.
2. Conduct continuous energy assessments to identify opportunities for improvement and enhance the efficiency of production processes and operations.
3. Encourage the use of renewable energy in production and office operations while supporting investments in renewable energy projects.
4. Raise awareness among employees at all levels about energy conservation through activities and training programs.
5. Comply with relevant energy laws, regulations, and standards while supporting transparent audits and energy management reporting.
6. Establish annual energy conservation plans and targets to progressively reduce energy consumption rates.

This policy will be communicated to all employees and relevant stakeholders to ensure awareness and active participation in the energy management process. Additionally, it will be reviewed and updated at least once a year to align with changing circumstances.

This policy is issued for acknowledgment and compliance by all.

Effective Date: January 9, 2024

(Mr Chusak Yongvongphaiboon)

Chief Executive Officer
