

Greenhouse Gas Management Policy

Asia Metal Public Company Limited (AMC) prioritizes minimizing environmental impact and strives toward sustainable business operations through effective greenhouse gas management. We are committed to reducing greenhouse gas emissions from our production processes and corporate operations through concrete measures as follows:

1. Adopt environmentally friendly and energy-efficient technologies in the production process, enhance energy efficiency, reduce reliance on fossil fuels, and promote the use of renewable energy.
2. Optimize raw material and resource utilization to minimize waste and carbon footprint while encouraging water and material reuse within the production process to reduce dependence on new resources.
3. Enhance logistics efficiency by minimizing transportation distances and fuel consumption while promoting low-carbon transportation, such as electric vehicles. Additionally, we collaborate with partners and the supply chain to reduce environmental impact and establish a more sustainable logistics system.
4. Foster an environmental culture and employee engagement by providing education and raising awareness about greenhouse gas reduction. We encourage employees to actively participate in initiatives such as reducing office energy consumption and utilizing resources efficiently to strengthen environmentally friendly and sustainable operations.
5. Support environmental conservation projects, including tree planting and waste reduction initiatives, to help restore natural resources.
6. Set greenhouse gas reduction targets in alignment with international standards, such as the Net Zero goal.
7. Analyze, monitor, and transparently report greenhouse gas emissions and reduction performance to stakeholders.

This policy is issued for acknowledgment and compliance by all.

Effective Date: July 1, 2023

(Mr Chusak Yongvongphaiboon)
Chief Executive Officer
