

Organizational Carbon Footprint Policy (CFO)

Asia Metal Public Company Limited has established a policy on the Carbon Footprint for Organization (CFO) to assess the organization's greenhouse gas emissions and removals. This initiative aims to measure, monitor, and ultimately reduce the organization's greenhouse gas emissions in the future.

1. Objectives

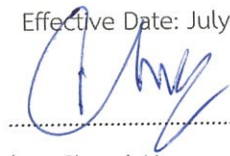

The purpose of this policy is to evaluate greenhouse gas emissions generated from the company's operations and activities. Additionally, it serves as a tool for calculating emissions, which will guide the development of effective greenhouse gas management strategies. This policy also aims to enhance employee awareness and preparedness in reporting the organization's greenhouse gas emissions and removals (Greenhouse Gas Reporting) in the future.

2. Scope

This policy applies to all operational processes related to the company. The assessment and data collection of greenhouse gas emissions and removals are conducted under the Operation Control Approach, which covers activities within the organization's control and operational scope. Employees from relevant departments are responsible for collecting and documenting data on greenhouse gas emissions and removals associated with the organization's activities. This data will be used for evaluation and reporting on the company's greenhouse gas emissions.

This policy is issued for acknowledgment and compliance by all.

Effective Date: July 1, 2022
