

## Sustainable Environmental Management Policy

Asia Metal Public Company Limited promotes corporate management that fosters sustainable development in alignment with the Environmental Management System Standard (ISO 14001:2015). To encourage the participation of executives, employees, and stakeholders in sustainable environmental management, the company has established the following environmentally friendly management policies:

1. Commit to complying with all laws and regulations related to energy conservation and environmental protection.
2. Enhance efficiency in the use of electricity, fuel, water, and other resources through continuous management improvements.
3. Ensure effective waste management and wastewater treatment that consistently meets quality standards.
4. Reduce greenhouse gas emissions across all operational activities within the company.
5. Prevent contamination and chemical or waste leaks from production processes by implementing emergency response plans and conducting regular drills to mitigate environmental impact.
6. Promote environmental sustainability through the procurement of eco-friendly products and services.
7. Allocate sufficient budget and resources to support environmental initiatives.
8. Communicate and disseminate the environmental policy to executives, employees, and stakeholders to raise awareness and encourage participation in sustainable energy and environmental conservation.

This policy is issued for acknowledgment and compliance by all.

Effective Date: December 16, 2024

( Mr Chusak Yongvongphaiboon )

Chief Executive Officer
