

## Waste and Waste Management Policy

Asia Metal Public Company Limited (hereinafter referred to as “AMC”) operates in the manufacturing and distribution of structural steel with a strong emphasis on environmentally friendly practices. The company recognizes the importance of effective waste and waste management arising from its production processes to prevent environmental impact on employees, surrounding communities, and stakeholders.

With a commitment to environmental management and sustainable business operations, AMC has established the following waste and waste management guidelines:

1. Supervise all operational processes to prevent environmental impacts resulting from waste and waste materials.
2. Continuously assess safety risks associated with waste and waste management in all processes to ensure employee well-being.
3. Encourage employee and stakeholder participation in waste and waste management efforts to raise awareness and promote engagement in environmental conservation.
4. Promote waste segregation and proper waste disposal in accordance with environmental impact reduction principles.
5. Evaluate and improve all related processes, from raw material sourcing, production, transportation, and storage, to minimize waste generation at the source.

This policy is issued for acknowledgment and compliance by all.

Effective Date: July 1, 2022
